

EXECUTIVE SUMMARY:

Versatile, results-driven IT Professional with over twenty (25) years of working experience with Java, J2EE, RPG and Web Services. Hands-on experience with front-end technologies using HTML, PHP, CSS and JavaScript; middle-tier technologies using JSP, Servlets and Struts; and a thorough understanding of Hibernate and experience with back-end technologies such as EJBs, SQL and multiple RDBMs. Long history with prominent ERP and financial software such as Lawson (ver 3-9.01 Unix, windows and iSeries), JD Edwards World. Comfortable with multiple JavaEE application servers, agile software development, CVS, testing, coding, and related technologies, including, other highlighted skills are as follows:

- Ability to independently design and implement small JavaEE projects from UI layer through to the database layer;
- Direct experience in project management with leading developer teams through entire software lifecycle;
- Strong written and verbal communication skills;
- Expertise in systems analysis, programming and development of sales and marketing B2B and B2C applications;
- Experienced leader in client training, systems tuning, EDI, web development and data modeling;
- Working experience with AJAX, FLASH and other Web 2.0 technologies;
- Direct experience with IBM's DB2 database; and
- Able to perform in a demanding environment, while retaining strong decision-making and follow-through capabilities.

TECHNICAL SKILLS:

Java, J2EE, XML, XSLT, PHP, JavaScript, Servlets, EJB, JSP, AJAX, FLASH, SOA, , RPG ILE, SQL, RPG/400, ILE C/400, Micro Focus Cobol, Unix, Websphere, HTML, CGI, DB2/400, RPG II, SWING, CL, C, CVS, BASIC, FORTRAN, COBOL, JDEdwards, Assembler, PeopleSoft, INFOS, SQR, Visual Basic, PL/SQL, VPN, TCP/IP, SNADS, Client Access, Optical Scanning, FTP, Networks, Conversions, ERP and CRM, AFE, 4GL Programmer Productivity Software, IIS, IBM iSeries (AS/400), pSeries (RS/6000).

EDUCATION and CERTIFICATIONS:

- Mountain West College of Business, Member of Board of Advisors and Instructor for "Systems Analysis and Design/Operating Systems, C and Assembler"
- IBM System/38 Certification
- Lawson Software & Upgrade Certification

PROFESSIONAL EXPERIENCE:

**Wynne Systems / United Rentals
Development Lead**

07/2004 - Present

- ERP system upgrade, Lawson ver 8.3 to 9.1. Cobol to RPG conversion.
- Java and RPG / SQL support for Wynne Systems software product offering RENTALMAN.
- Technical Lead for Integration of the RENTALMAN product with Qualcomms' Global Tracs Services through collaborative web service development.
- Websphere development support and development of SOA web services to interface other third party vendors such as SmartEquip with the RENTALMAN.

Ebi Synetics Group

07/2000 - 2009

Software architect and development

Consultant for RPG to Java Conversions and Java Development

- Responsible for Web technology development, design, programming and project management of eBI software.
- Managed the development of RPG to J2EE transformation technology.
- Developed and IDE framework written in Java (SWING, JDOM, Threads), with server side interaction with IBM iSeries.
- Developed the RPG to J2EE runtime technology, a framework employing J2EE technology, HTML, JavaScript, AJAX, XML/XSLT, Servlets, JDBC, and EJB.
- Developed transformation engine, (code generator), this program written in Java produces Java, J2EE code for the above-mentioned runtime framework from information gathered from legacy application on the iSeries. Transformed applications are deployed on Websphere Application Server.
- Website development, fully developed and implemented product website.
- Developed look and feel, graphics, HTML, JavaScript, and FLASH for presentation, **PHP/MySQL** server code for backend processing.

PMI Delta Dental

07/2000 - 06/2004

Development Team Lead

- Architect of firms HIPAA/EDI development.
- Analyzed business requirements and designed and developed a custom Middleware product on AS/400 to facilitate HIPAA/EDI requirements to integrate business
- Processes for several departments such as Claims Processing, Eligibility, Provider Compensation.
- Carried this process further to designing companies Web Portal Servlet.
- Design strategy-utilizing WebSphere to cooperate with Enterprises.
- Larger Web Portal integration strategy for Dentegra Group of companies using BizTalk.
- Utilized ERWIN for Data Modeling.

Lawson ERP Support

- Upgraded iSeries 400 Lawson Releases 6.1 to 7.2, including reviewing all impacted business processes.
- Provided needed support to Financial Services Department with custom interfacing of the Lawson ERP System to other business processes.

CRM Development

- Participated in the development and implementation of a new custom Java SWING based client software (CRM).
- Performed analysis and designed standards and automation processes for management techniques to facilitate development and implementation of server side stored procedures to support SWING based client.
- Significantly improved the team's productivity by eliminating errors and improving quality of developed code from a team of 25 programmers.
- Stored procedures were originally written for Oracle PL/SQL and were re-implemented using AS/400 server DB2 store procedures written in C and SQL.

Legacy Support

- Provided assistance as needed for Legacy System support for users "change request" evaluation, analysis, development and implementation.

Hines Horticulture Consultant

1998 - 06/2000

- Sales Reporting - gathered requirements and developed new Sales Reporting and Sales Compensation System to support changing business needs.
- Conversions - Accounting System conversions for various newly acquired nursery businesses.
- Analysis of acquired nursery companies financial data primarily A/R and billing practices for development of an approach to move data to Hines Corporate Accounting and Billing System.
- Software was customized version of Pansophic PCR on an AS/400.
- EDI - supported EDI processing from companies trading partners.

**Edison/Westec Security
Development Lead**

05/1997 - 2000

- Implementation of Lawson Payroll/Personnel System – implemented and developed interfaces to and from JDEdwards' World Accounting in 1990.
- Returned in 1997 for conversion of JDE systems to Lawson 7.0 on RS/600 platform using AIX and Oracle.
- Worked closely with Grant Thornton as primarily specialist responsible for analysis and development of multi-phase process to convert existing AS/400 systems to Unix platform.
- First phase involved migration of AS400 Lawson HR system to New Unix based version. Supported process from inception to implementation in production.
- Second phase involved migration of JDE GL/AR/AP and Sales Order processes to Lawson on Unix.
- Third phase involved the purchase of Westec by Edison and required multi-company consolidation of Financial Systems from entities using Great Plains software and Lawson financial implementations to one Consolidated Lawson Implementation.
- Final phase was retirement of old financial and sales support systems.

**Specialty Restaurants
IT Manager**

07/1991 - 1998

- Systems Management and Lawson Support - conversion, implementation, and general support of Lawson Accounting System.
- Predecessor to the deceased IT Manager acted as interim IT Manager for the company.
- Developed companies initiative to utilized new POS terminals at company's restaurants.
- System Hardware Migration - installation and conversion of AS/400 from old System/38.

**National Computer Systems
Product Development Manager**

1983 - 1988

- Management, development and installation IBM CIMSIII software for Education industry.
- Developed programmer productivity aids; increased development productivity 300%. Developed.
- Interface development -PC/38 connectivity, peripheral devices (i.e. Optical Scanners, Phone callers, etc.), SNADS, APPC.

[OTHER PROFESSIONAL EXPERIENCE DATES BACK TO 1977]
